Description

Summary:
Invalid credentials do not trigger an error message on the login page.

Steps to Reproduce:

1. Navigate to the OrangeHRM login page.
2. Enter an invalid username (`invalid_user`) and password (`invalid_pass`).
3. Click on the **Login** button.

Expected Result:

- The system should display an error message saying "Invalid credentials. Please try again."

Actual Result:

- No error message is displayed, and the page reloads without any feedback.

Environment:

- Browser: Google Chrome (v91.0.4472.124)
- OS: Windows 10

- Build Version: v5.0.1
